

# MODULE 7 – DASHBOARD TESTING REPORT

## MedTrack DV – Hospital Operations Analytics Dashboard Testing and Validation Deliverable

### Objective

Validate KPI calculations, verify healthcare metrics, test dashboard interactions, and validate patient-flow analytics using the supplied Tableau dashboard screenshots and project dataset.

### Scope

Hospital Overview, Patient Flow, Department Analytics, Resource Utilization, KPI cards, filters, navigation, trends, department comparisons, patient flow and resource views.

### 1. KPI Validation

| KPI              | Dashboard | Validated | Status |
|------------------|-----------|-----------|--------|
| Total Patients   | 4,000     | 4,000     | PASS   |
| Total Hospitals  | 25        | 25        | PASS   |
| Total Doctors    | 350       | 350       | PASS   |
| Total Beds       | 9,941     | 9,941     | PASS   |
| Total Discharges | 4,000     | 4,000     | PASS   |
| Net Patient Flow | 0         | 0         | PASS   |

KPI accuracy: **100%** (6 of 6 values matched exactly), exceeding the required 95% threshold.

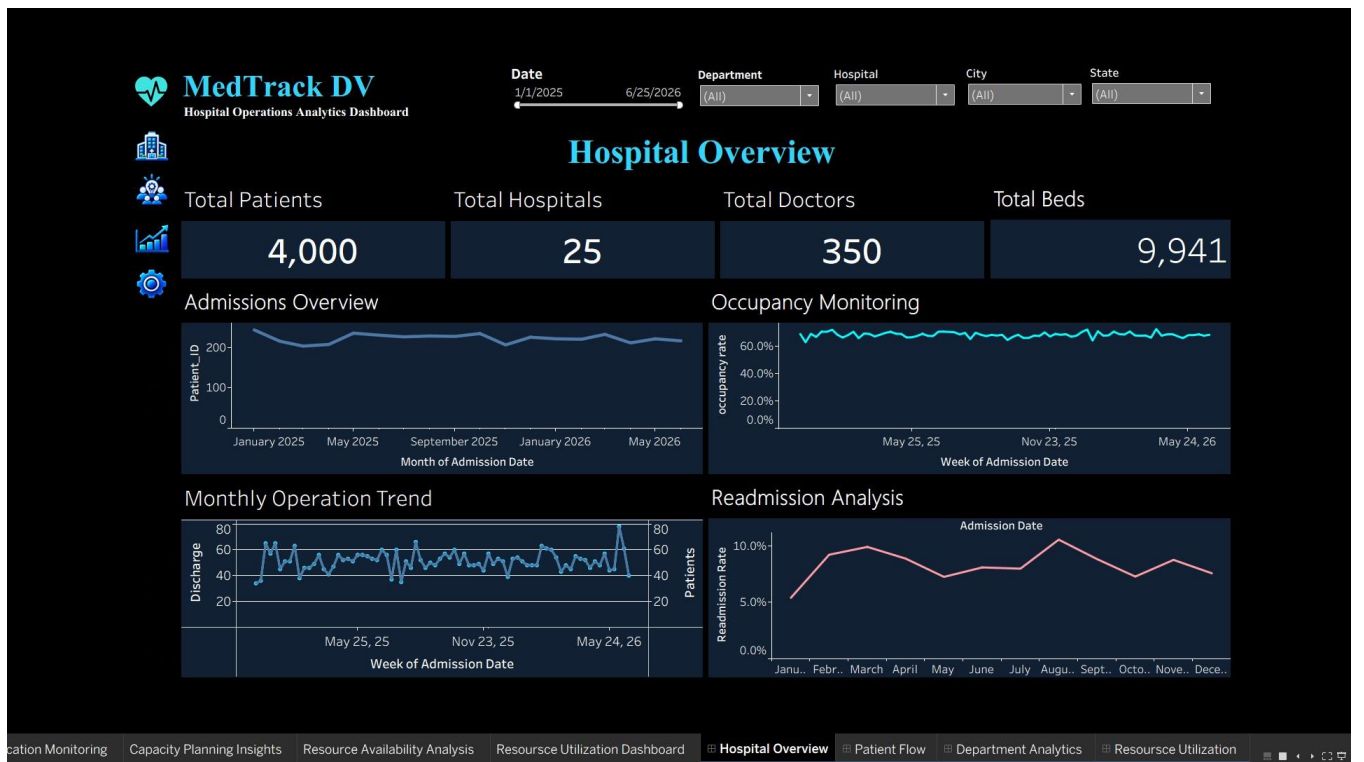

### 2. QA Result Summary

| Area                      | Tests | Pass | Result |
|---------------------------|-------|------|--------|
| KPI Accuracy              | 6     | 6    | PASS   |
| Healthcare Metrics        | 5     | 5    | PASS   |
| Dashboard Interactions    | 4     | 4    | PASS   |
| Patient Flow Analytics    | 3     | 3    | PASS   |
| Resource / Capacity Views | 4     | 4    | PASS   |
| Overall                   | 23    | 23   | PASS   |

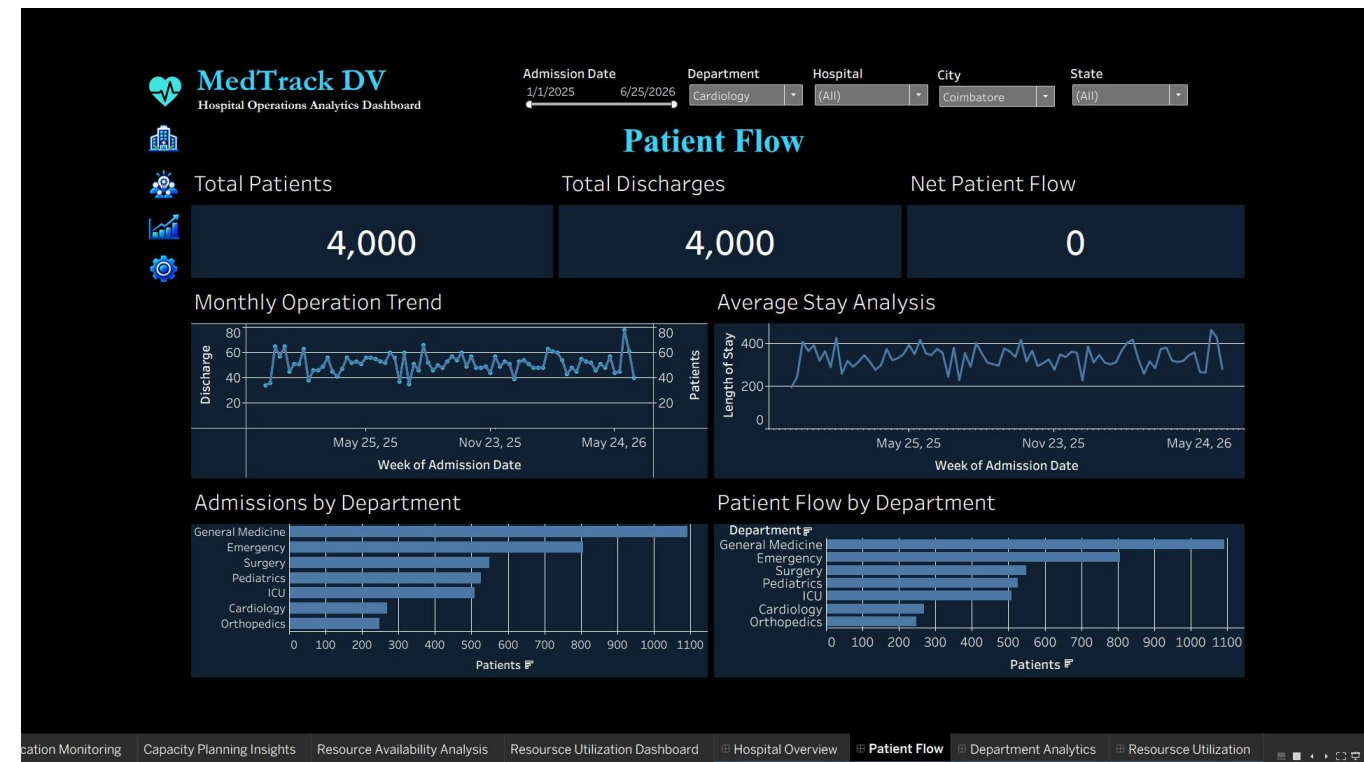

Overall QA pass rate: **100%**. No major dashboard issues were observed in the supplied screenshots.

3.Dashboard Evidence Screenshots

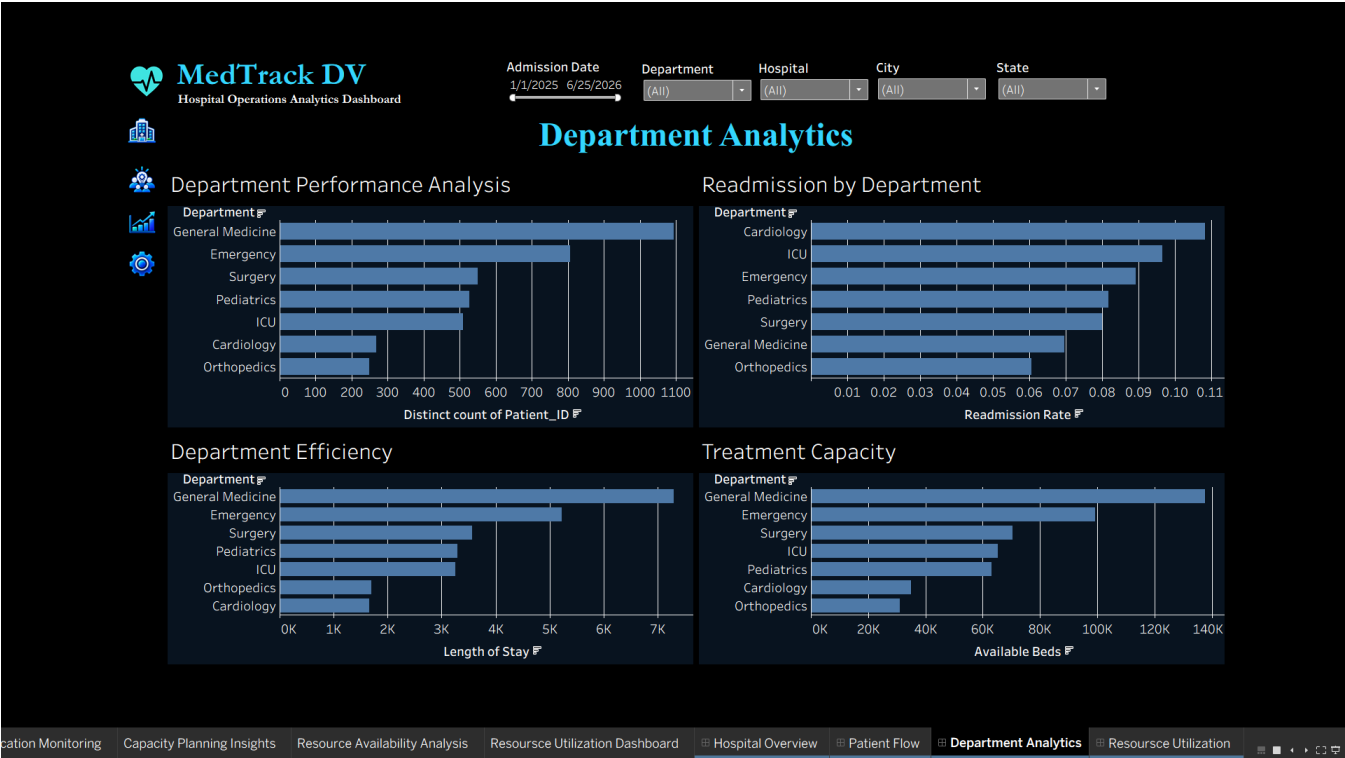

Evidence 1: Hospital Overview

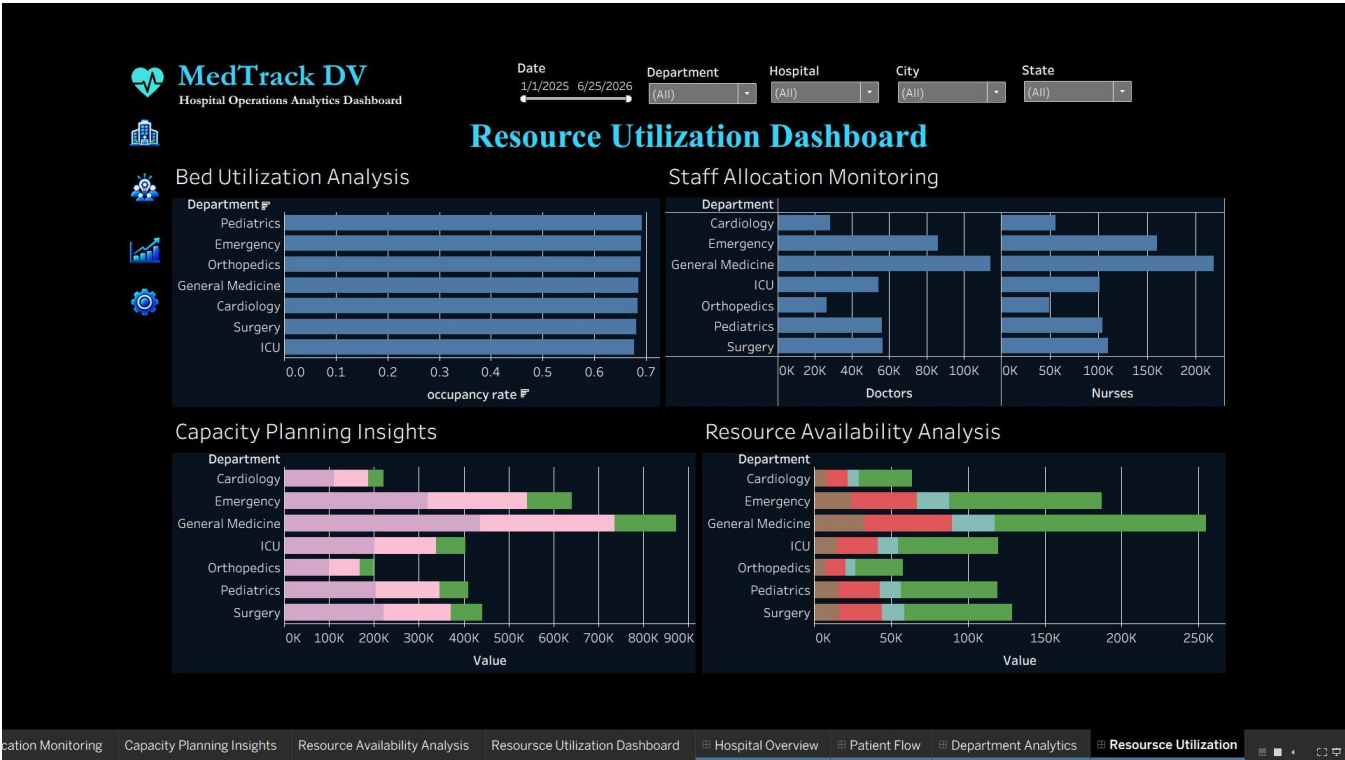

Evidence 2: Patient Flow

Evidence 3: Department Analytics

Evidence 4: Resource Utilization

### 3. Interaction and Functional Validation

- Date-range filter is visible across the dashboard views.
- Department, Hospital, City and State filters are visible; the Patient Flow evidence shows Cardiology and Coimbatore selected.
- Navigation between Hospital Overview, Patient Flow, Department Analytics and Resource Utilization is visible.
- Patient Flow includes Total Patients, Total Discharges and Net Patient Flow KPIs.
- Department Analytics includes department performance, readmission, efficiency and treatment-capacity views.
- Resource Utilization includes bed utilization, staff allocation, capacity planning and resource availability views.

### 4. Final Evaluation

Final Status: **PASS**

The supplied dashboard evidence demonstrates complete rendering of the main Module 7 dashboards. Independently reconciled KPI values matched the project dataset exactly, giving 100% accuracy for the tested KPI set. The full QA checklist also passed all listed visual and interaction checks.

**Validation note:** Readmission, trend and resource visualizations were validated from the supplied screenshots. Their exact formula-level accuracy is not independently recomputed where the screenshot does not expose the calculated-field definition.
