

Module 7 – QA Checklist

Testing & Validation | **MedTrack_DV**

KPI CALCULATION VALIDATION

- Validated KPI values across the dashboard suite
- Verified 12 KPI cards
- 12/12 KPI tests passed
- KPI validation accuracy = **100%**

DASHBOARD INTERACTION TESTING

- Department filters tested
- Type of Admission filters tested
- Severity of Illness filters tested
- Age Group filters tested
- Gender filters tested where applicable
- Dashboard visualizations checked after filter selections

HEALTHCARE METRIC VALIDATION

- Department performance metrics verified
- Bed utilization metrics verified
- Length-of-stay metrics verified
- Revenue/cost metrics verified
- Mortality-risk and severity metrics verified
- Patient volume and readmission metrics verified

PATIENT FLOW ANALYTICS VALIDATION

- Patient volume by department validated
- Patient disposition distribution reviewed
- Admission type distribution validated
- Readmission analytics reviewed
- Emergency vs Non-Emergency admission analysis validated
- Patient-flow charts checked for consistency

✔ **✓ OVERALL QA STATUS: PASSED** – No major dashboard issues were identified during the completed validation che

KPI Calculation Validation

12 KPI tests performed across the MedTrack_DV dashboard suite — all results verified against source data.

#	KPI	Dashboard	Verified Value	Status
1	Total Admissions	Hospital Overview	7,999	✓ PASS
2	Average Length of Stay	Hospital Overview	5.73	✓ PASS
3	Occupancy Rate	Hospital Overview	16.74%	✓ PASS
4	Bed Utilization	Hospital Overview	72.51%	✓ PASS
5	Department Efficiency	Hospital Overview	8.93	✓ PASS
6	Readmission Rate	Hospital Overview	9.05	✓ PASS
7	Total Departments	Department Analytics	6	✓ PASS
8	Average Bed Utilization	Department Analytics	72.51%	✓ PASS
9	Average Department Efficiency	Department Analytics	8.925	✓ PASS
10	Total Beds	Resource Utilization	751	✓ PASS
11	Occupancy Rate	Resource Utilization	5.21	✓ PASS
12	Available Bed Days	Resource Utilization	274,115	✓ PASS

Tests Failed

12

Tests Passed

100%

Validation Accuracy

Formula: KPI Accuracy = (Passed KPI Tests / Total KPI Tests) × 100 = (12 / 12) × 100 = **100%**

Evaluation Criterion: KPI accuracy above 95% | **Result:** ✓ PASSED

Dashboard & Analytics Validation

Comprehensive validation across three testing domains — all sections passed without major issues.

✓ PASS

SECTION 1 – HEALTHCARE METRICS

- Department efficiency metrics verified
- Average bed utilization verified
- Patient volume by department verified
- Average length of stay metrics verified
- Revenue by department verified
- Total cost by severity of illness verified
- Mortality risk distribution verified
- Severity of illness distributions verified
- Resource availability metrics verified
- Equipment utilization metrics verified

✂ PASS

SECTION 3 – PATIENT FLOW ANALYTICS

Disposition & Volume

- Patient disposition distribution validated
- Patient volume by department validated

Admission Analysis

- Admission type distribution verified
- Admission type by age group verified
- Emergency vs Non-Emergency admissions verified

Cost & Stay Metrics

- Average billing by department verified
- Average length of stay by admission type verified
- Average cost per day by admission type verified

Risk & Readmission

- Severity of illness distribution verified
- Payment type distribution verified
- Readmission by department verified

FINAL QA SUMMARY

- KPI Tests: 12/12 Passed
- KPI Validation Accuracy: 100%
- Dashboard Interaction Testing: PASS
- Healthcare Metrics Validation: PASS
- Patient Flow Analytics Validation: PASS
- Major Dashboard Issues: None identified

✓ PASS

SECTION 2 – DASHBOARD INTERACTIONS

- Department filter tested
- Type of Admission filter tested
- Severity of Illness filter tested
- Age Group filter tested
- Gender filter tested
- Filter selections checked for correct dashboard response
- Charts and KPI values reviewed after filtering
- Dashboard visuals remained consistent after interaction

MODULE 7 QA VALIDATION

✓ PASSED

"All tested KPI calculations, healthcare metrics, dashboard interactions, and patient-flow analytics were successfully validated."
