Actions: click a department to cross-filter all views; hover for exact values; select a KPI to open the related detailed dashboard.

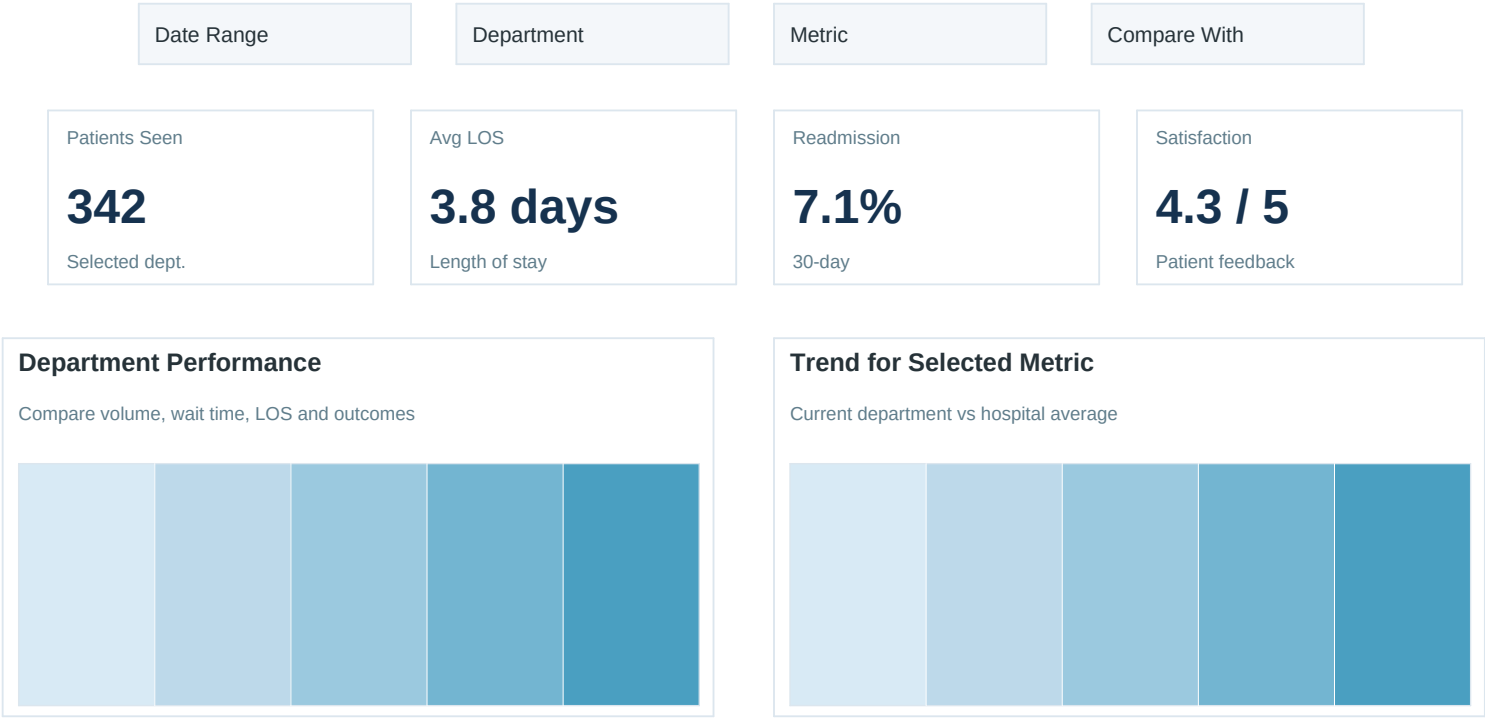

2. Patient Flow

Hospital Overview | Patient Flow | Department Analytics | Resource Utilization

3. Department Analytics

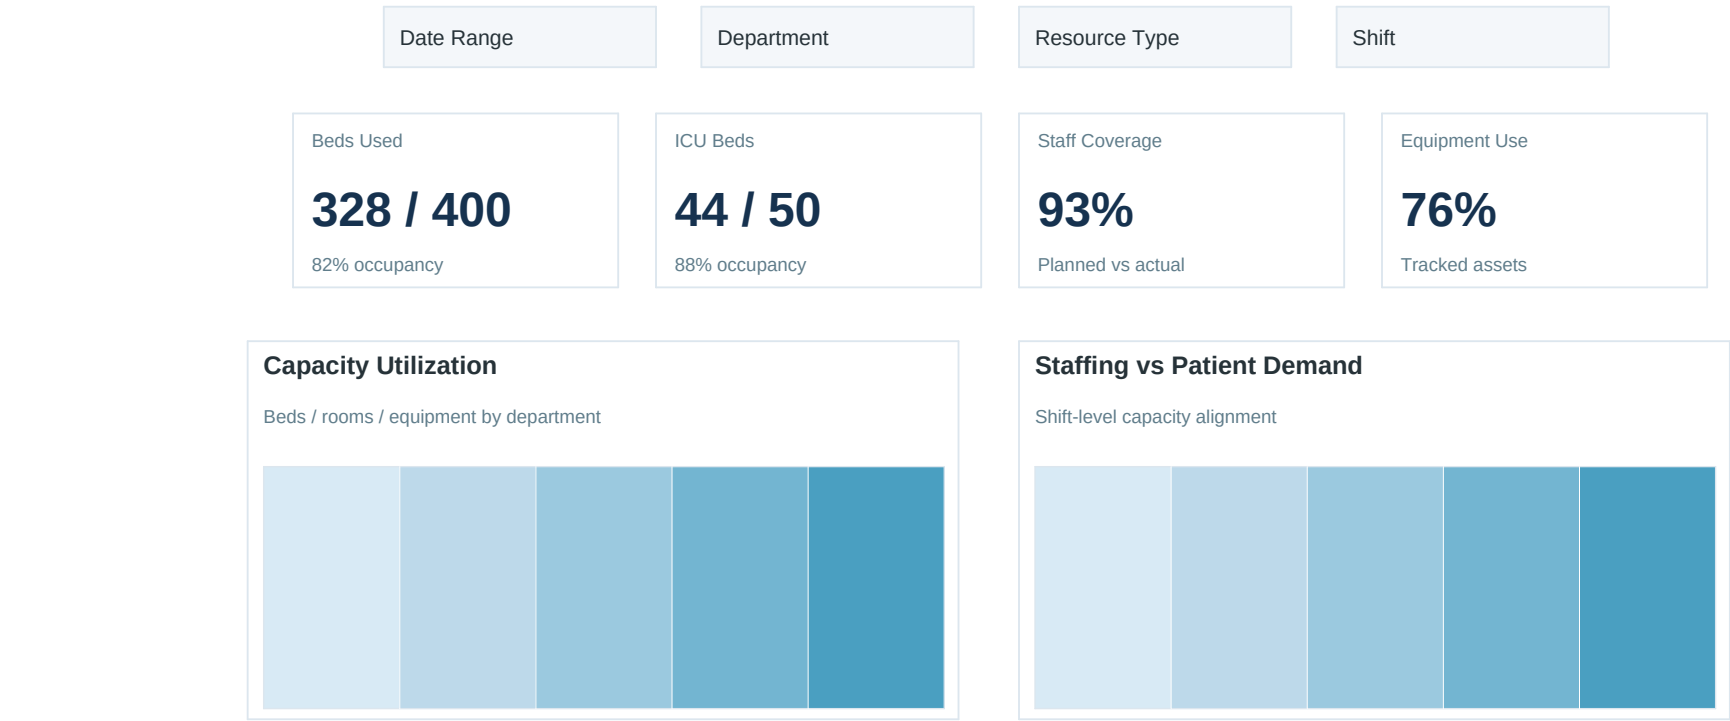

Hospital Overview | Patient Flow | Department Analytics | Resource Utilization

Department comparison: allow 2-4 departments to be selected. Normalize metrics where units differ and show hospital average as a reference line.

4. Resource Utilization

Hospital Overview | Patient Flow | Department Analytics | Resource Utilization

Actions: flag utilization above thresholds; click a resource category to filter; show tooltips with capacity, used, available and utilization %.

Interaction & Prototype Specification

Feature	Description
Global filters	Date range is global. Department, patient type/priority, resource type and shift are contextual. Provide a clear 'Reset Filters' action.
Navigation	Persistent top navigation with four dashboard tabs. Dashboard title indicates active view.
Dashboard actions	Filter actions on marks, highlight actions for comparisons, drill-down on time hierarchy, and navigation actions from KPI cards.
Department comparisons	Multi-select 2-4 departments. Use common metric definitions, hospital-average reference, consistent sorting and synchronized date range.
Tooltips	Show metric name, exact value, denominator/context, selected date period and comparison to prior period or target where available.
Accessibility	Use readable labels, avoid relying on color alone, keep sufficient contrast, and provide clear selected-state indicators.

Prototype verification checklist: all navigation buttons work; filters update intended sheets; reset returns default state; comparison selections remain readable; no blank or misleading views; tooltips display correct context.
