QA Checklist

Hospital Operations & Patient Analytics Dashboard

Quality Assurance & Functional Validation

QA Checklist

This checklist documents QA testing performed on the MedTrack_DV Hospital Operations & Patient Analytics Dashboard as part of Milestone 4 — Module 7: Testing & Validation. It covers KPI accuracy, visual integrity, filter functionality, navigation, and patient-flow analytics across all four dashboards: Hospital Overview, Patient Flow, Department Analytics, and Resource Utilization.

Test ID	Test Category	Test Case	Expected Result	Actual Result	Status
QA-01	KPI Accuracy	Total Admissions	10,000 admissions (displayed as 10K)	10K displayed	PASS
QA-02	KPI Accuracy	Total Patients	4,345 patients (displayed as 4.345K)	4.345K displayed	PASS
QA-03	KPI Accuracy	Average Age	53.60 years	53.60 displayed	PASS
QA-04	KPI Accuracy	Average Length of Stay	6.96 days	6.96 displayed	PASS
QA-05	KPI Accuracy	Readmission Rate	14.91% (displayed as 15%)	15% displayed — rounding	PASS
QA-06	KPI Accuracy	Occupancy Rate	19.64%	19.64% displayed	PASS
QA-07	KPI Accuracy	Admissions per Bed	21.28	21.28 displayed	PASS
QA-08	KPI Accuracy	Total Departments	7 departments	7 displayed	PASS
QA-09	Resource KPI	Total Hospital Beds	470 beds	470 displayed	PASS
QA-10	Resource KPI	Total Doctors	150 doctors	150 displayed	PASS
QA-11	Resource KPI	Total Nurses	278 nurses	278 displayed	PASS
QA-12	Visual Testing	Hospital Overview dashboard visual integrity	KPI cards and charts visible, no broken visuals, no major overlap	All elements render correctly	PASS
QA-13	Visual Testing	Patient Flow dashboard visual integrity	Patient-flow charts and KPI cards visible, no broken visuals	All elements render correctly	PASS
QA-14	Visual Testing	Department Analytics dashboard visual integrity	Department comparison charts and KPI cards visible, no broken visuals	All elements render correctly	PASS
QA-15	Visual Testing	Resource Utilization dashboard visual integrity	Resource charts and KPI cards visible, no broken visuals	All elements render correctly	PASS
QA-16	Filter Testing	Admission Date filter	Dashboard visuals update for selected date range	Filter tested successfully	PASS

Test ID	Test Category	Test Case	Expected Result	Actual Result	Status
QA-17	Filter Testing	Department filter	Dashboard visuals update for selected department	Filter tested successfully	PASS
QA-18	Filter Testing	Ward Type filter	Dashboard visuals update for selected ward type	Filter tested successfully	PASS
QA-19	Filter Testing	Admission Type filter	Dashboard visuals update for selected admission type	Filter tested successfully	PASS
QA-20	Navigation Testing	Hospital Overview → Patient Flow	Navigation opens the correct dashboard	Navigation tested successfully	PASS
QA-21	Navigation Testing	Patient Flow → Department Analytics	Navigation opens the correct dashboard	Navigation tested successfully	PASS
QA-22	Navigation Testing	Department Analytics → Resource Utilization	Navigation opens the correct dashboard	Navigation tested successfully	PASS
QA-23	Navigation Testing	Resource Utilization → Hospital Overview	Navigation opens the correct dashboard	Navigation tested successfully	PASS
QA-24	Patient Flow Testing	Monthly Patient Admissions Trend	Admission trend displays correctly	Displays correctly	PASS
QA-25	Patient Flow Testing	Monthly Discharges Trend	Discharge trend displays correctly	Displays correctly	PASS
QA-26	Patient Flow Testing	Peak Patient Load Monitoring	Peak patient load values and trend display correctly	Displays correctly	PASS
QA-27	Patient Flow Testing	Patient Movement Analysis	Patient movement correctly represented by admission type and ward type	Displays correctly	PASS
QA-28	Final Functionality	Cross-dashboard functionality and overall dashboard operation	All four dashboards, filters, navigation controls, KPIs and visuals operate correctly	All tested successfully	PASS

Test Summary

Total Test Cases	28	Defect Summary	
Passed	28	Critical	0
Failed	0	High	0
Pending	0	Medium	0
Pass Rate	100%	Low	0
Major Issues	0		
KPI Accuracy	Above 95%		
Overall Status	PASSED		

Conclusion: No major dashboard issues were identified during testing.

QA Validation Conclusion

"The MedTrack_DV Hospital Operations & Patient Analytics Dashboard successfully passed all 28 documented QA test cases. KPI values were validated against the source calculations, dashboard filters and navigation were tested successfully, and all four dashboards passed visual and functional validation. No critical, high, medium, or low severity defects were identified. The dashboard suite therefore satisfies the Milestone 4 Module 7 testing requirements and is ready for final project delivery."

OVERALL STATUS: PASSED
