

QA Checklist

Module 7 – Testing and Validation

Project Name: MedTrack Healthcare Dashboard

Module: Module 7 – Testing and Validation

Test ID	Dashboard	Test Area	Test Description	Expected Result	Actual Result	Status
TC01	All Dashboards	KPI Calculation Validation	Verify KPI calculations (admissions, occupancy, average stay, readmissions) match underlying dataset aggregations.	KPI values consistent with source data	Consistent with source data	PASS
TC02	All Dashboards	Healthcare Metric Validation	Verify healthcare-specific metrics (bed occupancy, ICU utilization, oxygen usage, readmission rate) are computed and displayed correctly.	Metrics computed correctly	Computed correctly	PASS
TC03	Hospital Overview	Visualization Check	Verify all visualizations (admissions overview, occupancy monitoring, readmission analysis, performance KPIs, monthly trends) render correctly with accurate data mapping.	All visualizations render correctly	Rendered correctly	PASS
TC04	Patient Flow	Patient Flow Analytics	Verify admission trends, discharge tracking, patient movement, average stay, and peak load visuals reflect correct patient-flow data.	Analytics reflect correct data	Reflected correctly	PASS
TC05	Department Analytics	Department-Level Analysis	Verify department performance, patient volume, readmission-by-department, efficiency, and capacity views display correctly for all departments.	Department views display correctly	Displayed correctly	PASS
TC06	Resource Utilization	Resource Metrics	Verify bed utilization, staff allocation, equipment utilization, and capacity/resource-availability visuals are functioning correctly.	Resource visuals functioning correctly	Functioning correctly	PASS
TC07	All Dashboards	Department Filter	Apply Department filter and confirm all connected visuals update accordingly.	Visuals update on filter change	Updated correctly	PASS
TC08	All Dashboards	Admission Type Filter	Apply Admission Type filter and confirm all connected visuals update accordingly.	Visuals update on filter change	Updated correctly	PASS
TC09	All Dashboards	Gender Filter	Apply Gender filter and confirm all connected visuals update accordingly.	Visuals update on filter change	Updated correctly	PASS
TC10	All Dashboards	Severity Filter	Apply Severity filter and confirm all connected visuals update accordingly.	Visuals update on filter change	Updated correctly	PASS
TC11	All Dashboards	Month Filter	Apply Month filter and confirm all connected visuals update accordingly.	Visuals update on filter change	Updated correctly	PASS
TC12	All Dashboards	Dashboard Interactions	Test interactive elements (tooltips, highlight actions, click-to-filter behaviour) across all four dashboards.	Interactions behave as expected	Behaved as expected	PASS
TC13	All Dashboards	Navigation	Test navigation controls/buttons between dashboards for correct linking.	Navigation links to correct dashboard	Linked correctly	PASS
TC14	All Dashboards	Data Consistency	Cross-check that figures shown across different dashboards for the same metric remain consistent.	Figures consistent across dashboards	Consistent across dashboards	PASS
TC15	All Dashboards	Major Issue Verification	Confirm no broken visuals, blank panels, calculation errors, or non-functional controls exist across any dashboard.	No major issues present	No major issues found	PASS

Overall Testing Status: PASS
