Project Overview

- **Purpose**

The **MedTrack_DV** dashboard suite is designed to provide an interactive view of hospital operations, patient flow, department performance, and resource utilization. It enables hospital administrators to monitor key performance indicators and make informed decisions using data visualizations.

- **Objectives**

1. Monitor overall hospital performance.
2. Analyze patient admissions and patient flow.
3. Evaluate department-wise performance.
4. Track hospital resource utilization.
5. Support data-driven decision-making through interactive dashboards.

Dashboard	Purpose
Hospital Overview	Overall Hospital performance
Patient Flow	Admission and discharge analysis
Department Analytics	Department performance analysis
Resource Utilization	Resource monitoring and utilization

Hospital Overview Dashboard

Purpose

Provides an executive summary of hospital performance by presenting key operational metrics, patient demographics, admission trends, and payment information through interactive visualizations.

Key Performance Indicators

- Total Admissions
- Average Length of Stay
- Occupancy Rate
- Bed Utilization
- Department Efficiency
- Readmission Rate

Visualizations

- Age Group Distribution
- Gender Distribution
- Admission Type
- Stay Category
- Payment Typology

Interactive Filters

- Gender
- Age Group
- Type of Admission
- Stay Category
- Payment Typology

Patient Flow Dashboard

Purpose

Provides insights into patient movement from admission to discharge by analyzing patient disposition, length of stay, and emergency admissions.

Key Metrics

- Patient Disposition
- Length of Stay
- Emergency Department Indicator
- Admission Type

Visualizations

- Patient Disposition
- Emergency Department Indicator
- Length of stay distribution
- Length of stay by Admission type

Interactive Filters

- Patient Disposition
- Emergency Department Indicator
- Stay Category
- Type of Admission

Department Analytics Dashboard

Purpose

Provides insights into department-wise performance by analyzing patient volume, staffing efficiency, bed capacity, and financial metrics to support operational decision-making.

Key Metrics

- Efficiency Score
- Patient Volume
- Staffing Ratio
- Bed Capacity
- Average Cost per Day
- Average Charge per Day

Visualizations

- Department Efficiency Analysis
- Average Total Cost by Payment Typology
- Average Total Charges by Payment Typology
- Severity of Illness Distribution
- Mortality Risk Distribution

Interactive Filters

- APR Severity of Illness
- APR Risk of Mortality
- Payment Typology
- APR Medical Surgical Description

Resource Utilization Dashboard

Purpose

Provides insights into hospital resource utilization by monitoring resource availability, category distribution, operational status, and overall utilization to improve efficiency and support resource planning.

Key Metrics

- Total Resources
- Active Resources
- Resource Category
- Resource Status
- Resource Utilization Rate

Visualizations

- Resource Category Distribution
- Resource Status
- Resources by Department
- Maintenance Resources

Interactive Filters

- Department name
- Resource Category
- Resource Status

Dashboard Navigation & Conclusion

Conclusion

The **MedTrack_DV Dashboard Storyboard** defines the structure, functionality, and navigation of the hospital analytics dashboards. It serves as the blueprint for developing an interactive Tableau solution that supports effective healthcare management and informed decision-making.
